MEMBUAT MENU DASHBOARD

Nama: Mohammad Yusuf Fathoni

Nim: 14523051

Kelas: Ti-2 smtr 6

Laporan Praktikum ke-4

1.membuat project baru

- Create new project
- Pilih empty views activity
- Beri nama siakad kemudian tekan finish

2.menambahkan library gradle(module) untuk tampilan lebih modern

- Klik Gradle scripts
- Kemudian Klik **build.gradle.kts**(mudule app)
- Setelah masuk tambahkan kode program berikut

```
buildFeatures {
    viewBinding = true // aktifkan view binding
}
```

- tambahkan kode di atas masukkan pada fungsi android seperti ini

```
5
6   android {
7       namespace = "com.example.siakad"
8       compileSdk = 36
9
10      buildFeatures {
11          viewBinding = true // aktifkan view binding
12      }
13
14      defaultConfig {
15          applicationId = "com.example.siakad"
16          minSdk = 24
```

- Kemudian tambahkan baris kode ini di paling bawah setelah fungsi android

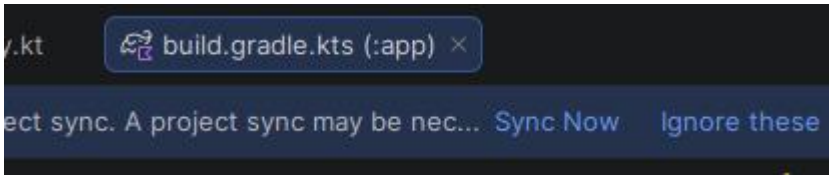
```
dependencies {
    implementation(libs.androidx.core.ktx)
    implementation(libs.androidx.appcompat)
    implementation(libs.material)
```

```
    implementation(libs.androidx.activity)
    implementation(libs.androidx.constraintlayout)
    testImplementation(libs.junit)
    androidTestImplementation(libs.androidx.junit)
    androidTestImplementation("com.google.android.material:material:1.11.0")
}
```

- Seperti gambar ini

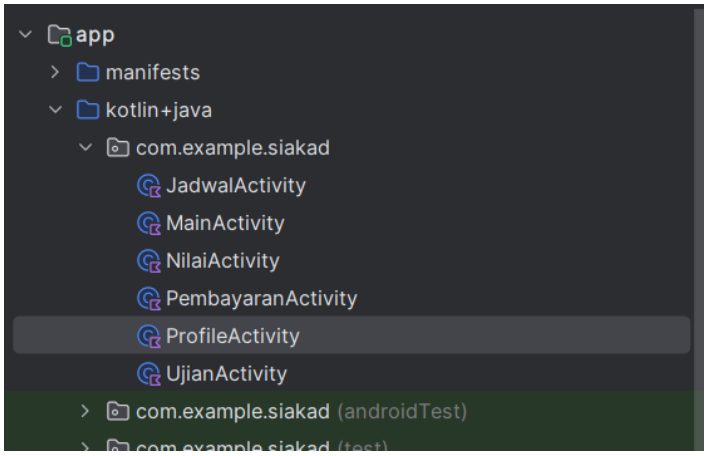
```
41  }
42
43  dependencies {
44
45      implementation(libs.androidx.core.ktx)
46      implementation(libs.androidx.appcompat)
47      implementation(libs.material)
48      implementation(libs.androidx.activity)
49      implementation(libs.androidx.constraintlayout)
50      testImplementation(libs.junit)
51      androidTestImplementation(libs.androidx.junit)
52      androidTestImplementation("com.google.android.material:material:1.11.0")
53  }
```

- Kemudian akan muncul notif seperti ini dan tekan saja sync now

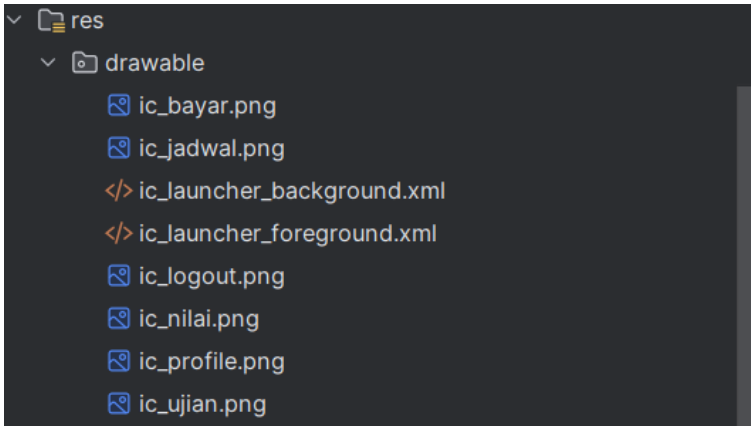


3.selanjutnya kita membuat activity baru (xmlnya akan terbuat sendiri setelah membuat activity Kotlin.ktnya)

- JadwalActivity.kt
- ProfileActivity.kt
- NilaiActivity.kt
- PembayaranActivity.kt
- UjianActivity.kt



4.Kemudian cari gambar untuk icon menu-menu activitynya dan di simpan di res/drawable seperti ini:



5.masuk ke halaman mainActivity.kt kemudian tambahkan kode program berikut:

```
package com.example.siaka

import android.content.Intent
import android.os.Bundle
import android.widget.Toast
import androidx.appcompat.app.AppCompatActivity
import com.example.siakad.databinding.ActivityMainBinding
class MainActivity : AppCompatActivity() {
    // deklarasi binding
    private lateinit var binding: ActivityMainBinding
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
// menghubungkan layout dengan activity
        binding = ActivityMainBinding.inflate(layoutInflater)
        setContentView(binding.root)
// ==========================
// MENU JADWAL
// ==========================
        binding.menuJadwal.setOnClickListener {
            Toast.makeText(this, "Menu jadwal", Toast.LENGTH_SHORT).show()
            val intent = Intent(this, JadwalActivity::class.java)
```

```
            startActivity(intent)
        }
// ==========================
// MENU PROFILE
// ==========================
        binding.menuProfile.setOnClickListener {
            Toast.makeText(this, "Menu Profile", Toast.LENGTH_SHORT).show()
            val intent = Intent(this, ProfileActivity::class.java)
            startActivity(intent)
        }
// ==========================
// MENU NILAI
// ==========================
        binding.menuNilai.setOnClickListener {
            Toast.makeText(this, "Menu Nilai",
                Toast.LENGTH_SHORT).show()
            val intent = Intent(this, NilaiActivity::class.java)
            startActivity(intent)
        }
// ==========================
// MENU UJIAN
// ==========================
        binding.menuUjian.setOnClickListener {
            Toast.makeText(this, "Menu Ujian",
                Toast.LENGTH_SHORT).show()
            val intent = Intent(this, UjianActivity::class.java)
            startActivity(intent)
        }
// ==========================
// MENU PEMBAYARAN
// ==========================
        binding.menuPembayaran.setOnClickListener {
            Toast.makeText(this, "Menu Pembayaran",
                Toast.LENGTH_SHORT).show()
```

```
            val intent = Intent(this, PembayaranActivity::class.java)
            startActivity(intent)
        }
// ==========================
// MENU LOGOUT
// ==========================
        binding.menuLogout.setOnClickListener {
            Toast.makeText(this, "Logout berhasil",
                Toast.LENGTH_SHORT).show()
            finish()
        }
    }
}
```

6.Selanjutnya pada activity_main.xml tambahkan kode program berikut:

```
<?xml version="1.0" encoding="utf-8"?>
<ScrollView xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="#F4F6FB">

    <LinearLayout
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:orientation="vertical">

        <!-- HEADER -->
        <LinearLayout
            android:layout_width="match_parent"
            android:layout_height="180dp"
            android:orientation="vertical"
```

```
    android:padding="20dp"
    android:background="#3F51B5">

    <TextView
        android:text="Dashboard"
        android:textSize="26sp"
        android:textColor="#FFFFFF"
        android:textStyle="bold"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"/>

    <TextView
        android:text="Selamat Datang"
        android:textSize="16sp"
        android:textColor="#FFFFFF"
        android:layout_marginTop="6dp"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"/>
</LinearLayout>

<!-- WRAPPER AGAR MENU DI TENGAH -->
<LinearLayout
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:gravity="center">

    <!-- GRID MENU -->
    <GridLayout
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:columnCount="2"
        android:padding="16dp">
```

```
<!-- ITEM TEMPLATE -->

<!-- MENU 1 -->
<androidx.cardview.widget.CardView
    android:id="@+id/menuJadwal"
    android:layout_width="0dp"

            android:src="@drawable/ic_bayar"
            android:layout_width="50dp"
            android:layout_height="50dp"/>

        <TextView
            android:text="Pembayaran"
            android:textStyle="bold"
            android:textSize="16sp"
            android:layout_marginTop="8dp"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:textAlignment="center"/>
    </LinearLayout>
</androidx.cardview.widget.CardView>

<!-- MENU 6 -->
<androidx.cardview.widget.CardView
    android:id="@+id/menuLogout"
```

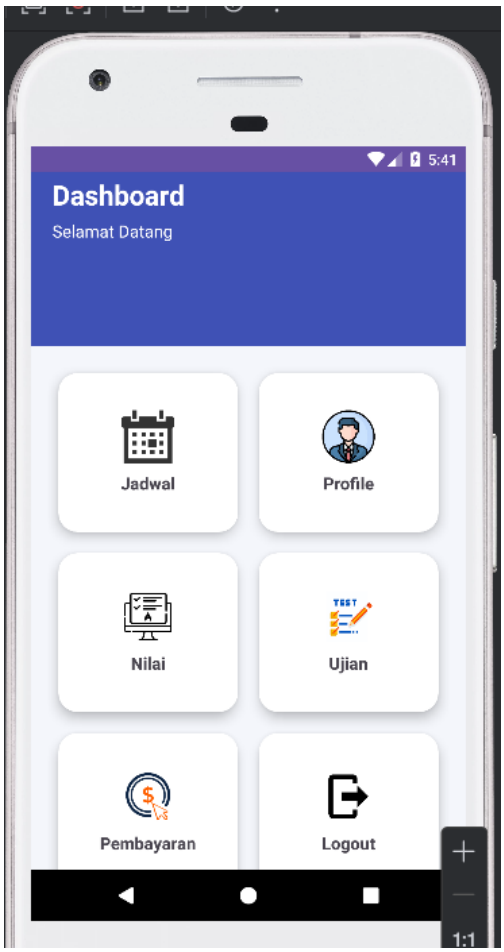
```
            android:layout_width="0dp"
            android:layout_height="150dp"
            android:layout_columnWeight="1"
            android:layout_margin="10dp"
            app:cardCornerRadius="18dp"
            app:cardElevation="8dp">

            <LinearLayout
                android:layout_width="match_parent"
                android:layout_height="match_parent"
                android:orientation="vertical"
                android:gravity="center">

                <ImageView
                    android:src="@drawable/ic_logout"
                    android:layout_width="50dp"
                    android:layout_height="50dp"/>

                <TextView
                    android:text="Logout"
                    android:textStyle="bold"
                    android:textSize="16sp"
                    android:layout_marginTop="8dp"
                    android:layout_width="wrap_content"
                    android:layout_height="wrap_content"
                    android:textAlignment="center"/>
            </LinearLayout>
        </androidx.cardview.widget.CardView>

    </GridLayout>
</LinearLayout>
```

```
    </LinearLayout>
</ScrollView>
```


7.Hasilnya seperti ini:
